

Procedure: 3.4.1p1. (II.D.1a)

Emergency Operations Planning

Revised: November 16, 2020; January 17, 2017; November 7, 2013

Last Reviewed: November 16, 2020; October 30, 2017

Adopted: October 3, 2001

I. PURPOSE:

The Emergency Operations Plan (EOP) mitigates the damage of potential events that could endanger the ability of a work unit or technical college to function. Each work unit or technical college shall develop, review and submit, at least annually, an EOP to the System Office. An EOP must include measures that provide for the safety of employees, students, volunteers, visitors, vendors and contractors as well as property and facilities. It must also include provisions to assess the severity of an incident and implement steps to eliminate the problem. The President is directly responsible for the implementation of this procedure and shall provide sufficient resources, personnel and administrative support to accomplish this end.

II. RELATED AUTHORITY: n/a

III. APPLICABILITY:

All work units and technical colleges associated with the Technical College System of Georgia.

IV. DEFINITIONS:

All Hazards: Any incident or event, natural or human caused, that requires an organized response by a public, private, and/or governmental entity in order to protect life, public health and safety, values to be protected, and to minimize any disruption of governmental, social, and economic services.

Assessment (Threat or Hazard): The method for determining risk and the resources and issues to be addressed in the EOP. Assessments include but are not limited to: site assessments, culture and climate assessments, behavioral threat assessments, and capacity assessments.

Drill: A drill is a coordinated, supervised activity usually employed to test a single specific operation or function in a single agency.

Exercise: An exercise is designed to test, whether in a functional design or full scale, to evaluate individual capabilities, multiple functions or activities within a function, or interdependent groups of functions.

Incident Command System (ICS): A standardized on-scene emergency management concept specifically designed to allow its user(s) to adopt an integrated organizational structure equal to the complexity and demands of single or multiple incidents, without being hindered by jurisdictional boundaries.

Mitigation: The capabilities necessary to eliminate or reduce the loss of life and property damage by lessening the impact of an event or emergency.

National Incident Management System (NIMS): A systematic, proactive approach guiding government agencies at all levels, the private sector, and nongovernmental organizations to work seamlessly to prepare for, prevent, respond to, recover from, and mitigate the effects of incidents, regardless of cause, size, location, or complexity, in order to reduce the loss of life or property and harm to the environment.

National Response Framework (NRF): The NRF is a guide to how the Nation responds to all types of disasters and emergencies. It is built on scalable, flexible, and adaptable concepts identified in the National Incident Management System to align key roles and responsibilities across the Nation.

Presidential Policy Directive 8 (PPD-8): This directive orders the strengthening of the security and resilience of the United States through systematic preparation for the threats that pose the greatest risk to the security of the nation, including acts of terrorism, cyber-attacks, pandemics, and catastrophic natural disasters.

Prevention: The capabilities necessary to avoid, deter, or stop an imminent crime or threatened or actual mass casualty incident.

Protection: The capabilities to secure against acts of terrorism and man-made or natural disasters.

Response: The capabilities necessary to stabilize an emergency once it has already happened or is certain to happen in an unpreventable way; establish a safe and secure environment; save lives and property; and facilitate the transition to recovery.

Recovery: The capabilities necessary to restore a setting affected by an event or emergency.

Training: Training may consist of briefings, to disseminate information about policy and/or procedures or hands-on training, to provide performance-based skills.

Vulnerabilities: The characteristics which make a setting or individual more susceptible to identified threats or hazards.

V. ATTACHMENTS:

- A. Attachment 3.4.1p1.a1 TCSG Emergency Operations Plan Template
- B. Attachment 3.4.1p1a2 Emergency Operations Planning Resources

VI. PROCEDURE:

- A. The President is directly responsible for the implementation of this procedure, and shall provide sufficient resources, personnel, and administrative support to accomplish this end.
- B. The EOP must be developed and implemented with regard to the “Guide for Developing High-Quality Emergency Operations Plans for Institutions of Higher Education, June 2013” US Department of Education et al. The protocol is as follows:
 1. Recognize the Intent of the Emergency Operations Plan (EOP): The intent of the EOP is to provide a planned and coordinated response in concert with local, state and federal authorities, to certain acts of violence, acts of terrorism, accidents, hazardous materials, as well as natural and man-made disasters at all locations for which the work unit or technical college is responsible.
 2. Form a Collaborative Planning Team: The planning team should be small enough to permit close collaboration, yet large enough to be representative of the work unit or technical college community, as well as the broader community. It should also be large enough to not place an undue burden on any single individual. The work unit or technical college will assign a single individual to serve as the Emergency Operations Coordinator (EOC).
 3. Understand the Situation: Identify possible threats and hazards, and assess the risk and vulnerabilities posed by those threats and hazards. This is typically performed through a threat and hazard identification, and risk assessment process that collects information about threats and hazards, and assigns values to risk for the purposes of determining which threats or hazards the EOP should prioritize and subsequently address.
 4. Develop Goals and Objectives: *Goals* are broad, general statements that indicate the desired outcome in response to the threat or hazard identified and/or prioritized. They are what personnel and other resources are to achieve. They help identify when major activities are complete and what defines a successful outcome. *Objectives* are specific, measurable actions that are necessary to achieve the goals.
 5. Develop EOP: (Identify Courses of Action): This plan details the strategies for the achievement of the goals and objectives by determining the following: the action, responsibility for the action, the timing and duration of the action, what proceeds and follows the action, resources required, effect of the action on specific populations, such as individuals with disabilities and others with access and functional needs or who may experience severe anxiety during traumatic events. ICS and NIMS principles should be employed in the development of the EOP.
 6. Prepare, Review, and Approve the EOP: Appropriate processes should be adopted and documented regarding the preparation of the EOP, including formatting and writing; review for compliance with national, state and local regulations and local support of the EOP by appropriate stakeholders and authorities (law enforcement, public safety and GEMA representatives should be considered.)

7. Maintain the EOP: The EOP shall be reviewed and revised as necessary each year. In addition, the EOP should be reviewed when any of the following have occurred: actual emergencies; changes have been made in policy, procedure, personnel, organizational structures, processes, facilities, or equipment; formal updates of planning guidance or standards have been finalized; formal exercises have taken place; changes in the surrounding community have occurred; threats or hazards change or new ones emerge; or ongoing assessments generate new information.
 8. Implement the EOP: Promulgate the EOP to all stakeholders. Train, drill and exercise all participants to their level of involvement. Document EOP implementation.
- C. The President shall submit the reviewed EOP to the TCSG System Office not later than May 1st of each calendar year.
 - D. The System Office shall review, coordinate the revisions of and approve the EOP. The System Office will provide technical assistance for the development and review processes as well as training, drills and exercises.

VII. RECORD RETENTION:

The currently implemented EOP and all of its revisions shall be retained for a three year period.

Promulgation Statement

The primary role of government is to provide for the welfare of its citizens. The welfare and safety of citizens is never more threatened than during emergencies. The goal of emergency management is to ensure that mitigation, preparedness, response, and recovery actions exist so that public welfare and safety is preserved.

The *{Technical College Name}* Emergency Operations Plan (EOP) provides a comprehensive framework for college-wide emergency management. It addresses the roles and responsibilities of government organizations and provides a link to local, state, federal, and private organizations and resources that may be activated to address emergencies at *{Technical College Name}*.

The *{Technical College Name}* EOP ensures consistency with current policy guidance and describes the interrelationship with other levels of government. This plan will continue to evolve, responding to lessons learned from actual emergency experiences, ongoing planning efforts, training and exercise activities, and Federal guidance.

Therefore, in recognition of the emergency management responsibilities of *{Technical College Name}* and with the authority vested in me as the President of *{Technical College Name}*, I hereby promulgate the *{Technical College Name}* Emergency Operations Plan.

President
{Technical College Name}

Date

Approval and Implementation

This plan supersedes the *{Technical College Name}* Emergency Operations Plan dated *{Month/Day/Year}*.

The transfer of management authority for actions during an incident is done through the execution of a written delegation of authority from an agency to the incident commander. This procedure facilitates the transition between incident management levels. The delegation of authority is a part of the briefing package provided to an incoming incident management team. It should contain both the delegation of authority and specific limitations to that authority.

The *{Technical College Name}* Emergency Operations Plan delegates the authority to specific individuals in the event that the president is unavailable. The chain of succession in a major emergency is as follows:

1. President
2. (Position Title)
3. (Position Title)
4. (Add as dictated by *{Technical College Name's}* organizational structure.)

President
{Technical College Name}

Exhibits

1. OVERVIEW

1.1 Purpose

The purpose of the *{Technical College Name}* Emergency Operations Plan (EOP) is to outline preparedness and response activities with regard to the various hazards that exist in the *{Technical College Name}* location(s) and setting(s). It is designed to clarify expectations for an effective response and to seamlessly integrate the processes and procedures described in the National Response Framework and local emergency operation plans or procedures.

1.2 Scope

This EOP applies to all participating operating units and agencies of the jurisdictions contained within the geographical boundary(ies) of the *{Technical College Name}*.

1.3 Situation Overview

Characteristics

{Technical College Name} includes *{Name of City/County}* and... *{add Cities, Counties or Countries as needed}*. *{Describe characteristics of cities/counties, including but not limited to: location, geography, demographics, designated areas of interest, special events, and economic base and infrastructure.}*

Hazard Vulnerability Assessment

{Technical College Name} completed the latest hazard vulnerability assessment on *{date of most recent assessment and name of assessment instrument}* in consultation with administration, faculty staff and external stakeholders of the *{Technical College Name}*. This hazard vulnerability assessment rated potential hazards on their frequency of occurrence. Each hazard is then rated as to potential impacts to life, property and environment, as well as to potential impacts on operations. A summary of the hazard vulnerability assessment for *{cite location(s)}* is as follows:

{Describe hazard vulnerability assessment results summary.}
{Append completed Hazard Vulnerability Assessment Instrument.}

1.4 Planning Assumptions

This EOP serves as a practical guide with modifications made to meet the demand of each emergency; because no plan can anticipate or predict every scenario, emergency management personnel must quickly adapt to events as they unfold. To this end it is assumed:

- Emergency situations individually, or in combination, may cause grave impacts on *{Technical College Name}*. These situations can vary in scope and intensity, from isolated areas of minimal impact to wide-ranging devastation.
- Planning is universal, based on the “all-hazards” approach.
- Planning recognizes and supports the principles of the National Incident Management, the Incident Command System, the National Response Framework and Presidential Policy Directive 8.
- Planning includes all constituencies, including, but not limited to: employees, students, volunteers, visitors, vendors and contractors.
- Planning incorporates all physical locations and settings for which the technical college has responsibility.
- Close professional working relationships are established among key college members prior to an emergency situation.
- Close professional working relationships are established with appropriate external agencies prior to an emergency situation, i.e., local, state, and federal law enforcement; fire departments; emergency management services; public health agencies; as well as medical facilities and volunteer organizations such as the American Red Cross.
- Public information is of vital importance and, as all emergencies are newsworthy and may receive media coverage including social media, the technical college will monitor and respond appropriately.
- Individual technical college operating units must design additional cooperative college response plans for situations that may develop under their purview.
- During response and recovery phases, officials under this EOP have the responsibility to save lives, protect property, relieve human suffering, sustain survivors, support constituencies, restore services, repair essential facilities and protect the environment.

1.5 Definitions

All Hazards: Any incident or event, natural or human caused, that requires an organized response by a public, private, and/or governmental entity in order to protect life, public health and safety, values to be protected, and to minimize any disruption of governmental, social, and economic services.

Assessment (Threat or Hazard): The method for determining risk and the resources and issues to be addressed in the EOP. Assessments include but are not limited to: site assessments, culture and climate assessments, behavioral threat assessments, and capacity assessments.

Drill: A drill is a coordinated, supervised activity usually employed to test a single specific operation or function in a single agency.

Exercise: An exercise is designed to test, whether in a functional design or full scale, to evaluate individual capabilities, multiple functions or activities within a function, or interdependent groups of functions.

Incident Command System (ICS): A standardized on-scene emergency management concept specifically designed to allow its user(s) to adopt an integrated organizational structure equal to the complexity and demands of single or multiple incidents, without being hindered by jurisdictional boundaries.

Mitigation: The capabilities necessary to eliminate or reduce the loss of life and property damage by lessening the impact of an event or emergency.

National Incident Management System (NIMS): A systematic, proactive approach guiding government agencies at all levels, the private sector, and nongovernmental organizations to work seamlessly to prepare for, prevent, respond to, recover from, and mitigate the effects of incidents, regardless of cause, size, location, or complexity, in order to reduce the loss of life or property and harm to the environment.

National Response Framework (NRF): The NRF is a guide to how the Nation responds to all types of disasters and emergencies. It is built on scalable, flexible, and adaptable concepts identified in the National Incident Management System to align key roles and responsibilities across the Nation.

Presidential Policy Directive 8 (PPD-8): This directive orders the strengthening of the security and resilience of the United States through systematic preparation for the threats that pose the greatest risk to the security of the nation, including acts of terrorism, cyber-attacks, pandemics, and catastrophic natural disasters.

Prevention: The capabilities necessary to avoid, deter, or stop an imminent crime or threatened or actual mass casualty incident.

Protection: The capabilities to secure against acts of terrorism and man-made or natural disasters.

Response: The capabilities necessary to stabilize an emergency once it has already happened or is certain to happen in an unpreventable way; establish a safe and secure environment; save lives and property; and facilitate the transition to recovery.

Recovery: The capabilities necessary to restore a setting affected by an event or emergency.

Train: Training may consist of briefings, to disseminate information about policy and/or procedures or hands-on training, to provide performance-based skills.

Vulnerabilities: The characteristics which make a setting or individual more susceptible to identified threats or hazards.

2. CONCEPT OF OPERATIONS

2.1 General

This EOP is supported by the local, state and federal organization levels of emergency management. Preparedness, prevention, response, recovery and mitigation are general responsibilities of all levels of government working together to provide a delivery system to meet the needs of the response community. Emergency operations will be initiated at the lowest level of government able to respond effectively and efficiently.

2.2 Plan Activation

This EOP is activated in response to actual or potential emergencies which occur or are likely to occur on or within the immediate area of the technical college locations. However, *{Technical College Name}* maintains an active approach to prevention, preparedness, response, recovery and mitigation at all times.

This EOP is brought into action by declaration of an emergency by the President, designee, or by the highest-ranking executive-level senior administrator who is currently available. Once an emergency has been declared, the members of the Policy Group, whose responsibilities are described below, and other support personnel are, to the extent possible, relieved of routine duties, to more fully concentrate on the tasks at hand. The President, or designee, will notify the Commissioner of the Technical College System of Georgia of such an emergency.

The President maintains executive control of the EOP. *{Technical College Name}* personnel and equipment will be utilized to provide priority protection of life, preservation of property, and restoration services to the college. The members of the Policy Group will determine the manner in which resources are utilized.

{Describe emergency operations incidents for the previous academic year here.}

{Describe Emergency Operations Center activations for the previous academic year, if applicable, here.}

3. ORGANIZATION AND ASSIGNMENT OF RESPONSIBILITIES

This portion of the EOP defines the roles and responsibilities of members of the Policy Group involved in the emergency management process. This EOP describes the responsibilities during the activation of the EOP. The following is a generalized accounting; individual technical college organization and assignment of responsibilities will dictate the specific organizational structure.

{Describe selected Policy Group composition here.}

3.1 Policy Group Membership, may include, but is not limited to:

- President
- Executive Vice President(s)
- Vice President(s) Academic Affairs, Student Affairs, etc...
- Provost(s), Dean(s), Director(s)

Chief of Police/Director of Public Safety
Facilities
Human Resources
Local Board Representation
Faculty Representation
Student Representation
Information Technology

3.2 The Policy Group responsibilities may include, but are not limited to:

1. Strategic
 - a. Makes major policy, strategic or resource decisions when critical functions of the college are interrupted.
 - b. Provides leadership and motivation.
 - c. Provides direction and vision for recovery and post-emergency restoration.
2. Resource Allocation
 - a. Ensures adequate resources provided to meet needs.
 - b. Empowers staff to implement response plans.
 - c. Establishes and authorizes emergency budgetary parameters.
 - d. Coordinates recovery with individual operating units.
 - e. Authorizes contingency contractual agreements.
3. Operations
 - a. Orders suspension or interruption of operations.
 - b. Approves extension of or waiving of deadlines.
 - c. Pursues means to resume normal operations as quickly as possible.
4. Communications
 - a. Notifies, informs and updates all constituencies and stakeholders.
 - b. Ensures applicable policy decisions are communicated.
 - c. Serves as interface with counterparts at local, state and federal levels as appropriate.
 - d. Authority over public information releases.
5. Incident Specific
 - a. Declares college emergency.
 - b. Establishes incident response level.
 - c. Determines overall college status and identifies needs/responsibilities.
 - d. Conducts post-emergency briefing.
6. Planning
 - a. Ensures organizational readiness through appropriate planning processes.
 - b. Authorizes overall college response strategies and plans.
 - c. Supports and participates in training, exercises and outreach.

4. DIRECTION, CONTROL AND COORDINATION

To provide for the effective direction, control, and coordination of an incident, the technical college EOP will be activated including the implementation of the Incident Command System (ICS). The Incident Commander is delegated the authority to direct strategic on-scene operations until a coordinated incident management framework can

be established with local authorities. The Policy Group is responsible for providing the Incident Commander with strategic guidance, information analysis, and needed resources.

The ICS is organized into the following functional areas:

A. Incident Command: Directs the incident management activities using strategic guidance provided by the Policy Group. Responsibilities and duties include, but are not limited to:

- Establish and manage the Command Post, establish the incident organization, and determine strategies to implement protocols and adapt as needed.
- Monitor incident safety conditions and develop measures for ensuring the safety of building occupants (including all constituencies and responders).
- Coordinate media relations and information dissemination with Policy Group.
- Develop working knowledge of local/regional agencies; serve as the primary on-scene contact for outside agencies assigned to an incident; and assist in accessing services when the need arises.
- Document all activities.

B. Operations Section: Directs all tactical operations of an incident including implementation of response/recovery activities according to established incident management procedures and protocols, care of students, first aid, crisis intervention, search and rescue, site security, damage assessment, evacuations, and the release of students. Specific responsibilities include but are not limited to:

- Implement an incident action plan.
- Assist in securing facility.
- Monitor utilities (i.e., electric, gas, water, heat/ventilation/air conditioning) and shut off if danger exists or directed by Incident Commander.
- Establish medical triage and request additional supplies from the Logistics Section.
- Coordinate the rationed distribution of food and water, establish secondary toilet facilities in the event of water or plumbing failure, and request needed supplies from the Logistics Section.
- Analyze technical college staffing to develop plans for reunification.
- Document all activities.

C. Planning Section: Collects, evaluates, and disseminates information needed to measure the size, scope, and seriousness of an incident and to plan appropriate incident management activities. Duties include but are not limited to:

- Assist Incident Commander in the collection and evaluation of information about an incident as it develops (including site map and area map of related events), assist with ongoing planning efforts, and maintain incident time log.
- Document all activities.

D. Logistics Section: Supports incident management operations by securing and providing needed personnel, equipment, facilities, resources, and services required for incident resolution; coordinating personnel; assembling and deploying volunteer teams; and facilitating communication among incident responders. Additional responsibilities include but are not limited to:

- Establish and oversee communications center and activities during an incident.
- Document all activities.

E. Finance/Administration Section: Oversees all financial activities including purchasing necessary materials, tracking incident costs, arranging contracts for services, timekeeping for emergency responders, submitting documentation for reimbursement, and recovering school records following an incident. Additional duties include but are not limited to:

- Assume responsibility for overall documentation and recordkeeping activities; when possible, photograph or videotape damage to property.
- Develop a system to monitor and track expenses and financial losses, and secure all records.

F. Coordination with First Responders

{Name of Technical College} has excellent working relationships with external agencies. These relationships aid in the coordination of services between the agencies and *{Name of Technical College}* and include, but are not limited to municipal and county entities such as mental health, law enforcement, and fire departments. Written agreements specify the type of communication and services provided by one agency to another. If an incident is within the authorities of the first-responder community, command will be transferred upon the arrival of qualified first responders. A transfer of command briefing shall occur. The technical college's Incident Commander may be integrated into the Incident Command structure or assume a role within a Unified Command structure.

{List existing MOAs/MOUs, mutual aid agreements here.}

5. INFORMATION, COLLECTION, ANALYSIS AND DISSEMINATION

During the course of normal daily operations, local conditions are monitored via internet websites, NOAA, NWS, weather radios, law enforcement alerts, and local crime reports.

{Describe specific sources of information utilized by the technical college. Include, at minimum, identity of local EMA and other pertinent public safety agencies.}

Sources include, but are not limited to the following:

- National Oceanic and Atmospheric Administration (NOAA): [Contact NOAA here.](#)
- National Weather Service (NWS): [Contact NWS here.](#)

- Georgia Emergency Management Agency/Homeland Security: [Contact GEMA here.](#)
- Local law enforcement agencies *{List contacts here.}*
- Local fire service agencies: *{List contacts here.}*
- Local EMA director/agency: *{List contacts here.}*
- Local hazardous materials agencies: *{List contacts here.}*
- Local media sources: *{List sources here.}*

One important emergency function is to collect, analyze and properly disseminate situational information to the faculty/staff and personnel to make operational decisions for current and future operational periods. In order to obtain true and accurate situational information, all organizational units within the campus community and personnel must provide updates, damage assessments and resource status reports to the college President or designee.

Prior to the public release of data, information must be vetted; particularly in the event of criminal activity. Information regarding an incident is to be released only on a need to know basis.

6. TRAINING DRILLS AND EXERCISES

Seek Shelter (Tornado) drills:

Evacuation (Fire) drills:

Armed Intruder Exercise: The technical college recognizes the imperative requirement from the TCSG System Office with regard to participating in an Armed Intruder Exercise. The Armed Intruder exercise will be held in conjunction with local law enforcement agencies, as well as other emergency services. Campuses, Dates

NIMS & ICS: The technical college will identify key college personnel, and others who may have a need to become involved in emergency response operations, and provide training for Incident Command Structure (ICS) and/or National Incident Management System (NIMS) training.

{Describe training, drills and exercises performed/planned for the previous academic year, as well as the protocols for the retention of training records here.}

7. ADMINISTRATION, FINANCE AND LOGISTICS

- Ensure preservation and safekeeping of all records.
- Arrange for temporary workspace and relocate essential services.
- Initiate a record-keeping system for all expenditures associated with emergency operations.
- Coordinate with Purchasing on procedures for handling emergency expenditures.

8. PLAN DEVELOPMENT AND MAINTENANCE

This EOP is developed with input from across technical college constituencies and in collaboration with external stakeholders and evaluated at minimum once each year or more frequently should emergencies or organizational structure dictate changes. Training, drills and exercises will be conducted periodically to ensure that all members of the college community understand how to carry out the provisions of the plan.

{Describe protocols for the annual review and retention of the EOP here.}

Functional Annexes

Evacuation

This annex focuses on procedures executed to evacuate all constituencies from buildings, facilities and grounds associated with the technical college.

Exhibit plans that meet each of these goals:

1. Account for individuals located in various locations at different points in the day/week.
2. Safely move individuals from unsafe areas to designated assembly areas including but not limited to classrooms, student housing facilities, campus grounds, dining halls, stadiums, conference centers and other locations.
3. Establish alternate routes when primary evacuation routes are unusable.
4. Evacuate individuals with disabilities (along with service animals and assistive devices, e.g., wheelchairs) and others with access and functional needs, including language, transportation and medical needs.
5. Reunify individuals in a safe and efficient manner.

{Suggested cited resources: Building/unit safety plans, emergency procedures training materials, building emergency postings.}

Deny Entry/Closing/Lockdown Annex

This annex focuses on procedures required to secure buildings, facilities, and grounds during incidents that pose an immediate threat or hazard including, but not limited to, crime, bomb threat or the event of a chemical or biological hazard in or around the technical college. In the event of a chemical or biological hazard, all constituencies may be required to move to areas that can be sealed. The primary objective of secure-in-place is to quickly ensure all constituencies are secured in areas away from immediate danger.

Exhibit plans to meet each of these goals:

1. Account for individuals located in various locations at different points in the day/week.
2. Secure exterior accesses to buildings and facilities when it may or may not be safe to do so.
3. Identify building characteristics (i.e., windows, doors) which may impact possible deny entry/closing/lockdown procedures.
4. Employ variations of deny entry/closure/lockdown procedures (when outside activities are curtailed, doors are locked, and visitors closely monitored but all other activities continue as normal).

{Suggested cited resources: Building/unit safety plans, emergency procedures training materials, building emergency postings.}

Shelter-in-Place/Secure-in-Place Annex

This annex focuses on procedures needed when all constituencies are required to remain indoors, potentially for an extended period of time, because it is safer inside a building or a room than outside. Depending on the hazard, all constituencies may be required to move to locations without windows, or to a designated weather shelter (as in the event of severe weather).

Exhibit plans to meet each of these goals:

1. Determine supplies needed to seal the room and to provide for the needs of all constituencies (e.g., water).
2. Identify how a shelter-in-place directive can affect individuals with disabilities and others with access and functional needs who require durable medical equipment and personal assistance services.
3. Identify alternate shelter locations when the primary shelter location is unusable.
4. Determine how to locate and shelter all constituencies.
5. Determine the need for and integration of “safe rooms” for protection against extreme wind hazards (such as a tornado or hurricane) in order to provide immediate life-safety protection when evacuation is not an option.

{Suggested cited resources: Building/unit safety plans, training materials, building emergency postings.}

Accounting for All Persons Annex

This annex focuses on procedures for accounting for the whereabouts and well-being of all constituents and identifying those who may be missing.

Exhibit plans to meet each of these goals:

1. Determine who should be in attendance at the assembly area.
2. Determine what to do when an individual cannot be located.
3. Determine how personnel will report to the assembly supervisor.
4. Determine how and when individuals will be permitted to resume their activities.

{Suggested cited resources: Building/unit safety plans, training materials, building emergency postings.}

Communications and Notifications Annex

This annex focuses on procedures related to communication and coordination during emergencies. Included are procedures for internal communication with all constituencies as well as families; and communication with external stakeholders both before and after an emergency.

Exhibit plans to meet each of these goals:

1. Integrate communications systems into the local emergency response communications network (e.g., fire department, law enforcement agencies).
2. Communicate with community partners in accordance with pre-established agreements (e.g., memoranda of understanding).
3. Ensure relevant individuals can operate communications equipment/systems.
4. Communicate with all constituencies, families and the broader community before, during, and after an emergency, including using alert and notification systems.
5. Account for technology barriers and language access barriers faced by individuals.
6. Communicate to the broader community, including off-campus student activities or events on technical college grounds sponsored by third-parties.
7. Ensure effective communication with individuals with disabilities and others with access and functional needs.
8. Obtain and update emergency contact information for all constituencies.
9. Interact with emergency contacts, including international contacts, during or following an emergency.
10. Track individuals transported to other locations for care or shelter.
11. Coordinate information sharing among hospitals, families, and the technical college.
12. Verify consistency with the requirements in the Clery Act, the Health Insurance Portability and Accountability Act (HIPAA), the Family Educational Rights and Privacy Act (FERPA), and civil rights laws.
13. Communicate with individuals including members of the public who refuse to comply with safety instructions.

{Suggested cited resources: Communication/Notification system plans, policies and protocols; training materials, building emergency postings.}

Business Continuity Annex

This annex focuses on procedures to ensure essential functions continue during an emergency and its immediate aftermath. Essential functions include business services (e.g., payroll and purchasing), communication (internal and external), computer and systems support, facilities maintenance, safety and security, and continuity of teaching and learning.

Exhibit plans to meet each of these goals:

1. Design the Business Continuity Plan for immediate activation and to be sustained for at least 30 days.
2. Set priorities for re-establishing essential functions, such as restoring operations, and maintaining the safety and well-being of students and the learning environment.
3. Establish succession of command for executive leadership.
4. Ensure students receive related services (e.g., financial aid, instruction, food, and student housing) in the event of a prolonged closure.
5. Develop agreements with other institutions to prepare for emergency situations when the technical college may not be able to provide routine services for prolonged periods of time.

Recovery Annex

This annex focuses on how a technical college will recover from an emergency. The four most fundamental kinds of recovery are academic recovery, physical recovery, fiscal recovery and psychological and emotional recovery.

Exhibit plans to meet each of these goals:

Academic Recovery:

1. Delineate procedures for and authority structure for closure and reopening of the technical college.
2. Determine and arrange facilities for temporary location of functions.
3. Provide alternate educational programming in the event that students cannot physically reconvene.

Physical Recovery:

1. Document assets in order to assess damage.
2. Identify personnel with expertise concerning assets, and how and where records will be accessed for verification after an emergency.
3. Provide for the sheltering needs of individuals living on campus.
4. Address research facilities that contain sensitive information, materials, or animals.
5. Coordinate with utility and insurance companies before an emergency to support recovery.

Fiscal Recovery:

1. Identify leadership to be included (e.g., the president, chief business officer, personnel director, and risk manager).
2. Communicate timely and factual information regarding returning to work or studies.
3. Identify sources for emergency relief funding.

Psychological and Emotional Recovery:

1. Identify leadership and provide counselors.
2. Identify location of counseling and psychological first aid.
3. Create a calm and supportive environment, share basic information about the emergency, provide psychological first aid (if trained), and identify those who may need immediate crisis counseling.
4. Secure a sufficient number of counselors and others trained in psychological first aid in the event of an emergency for immediate, short-, and long-term counseling needs of students, faculty, staff, and families.
5. Handle commemorations, memorial activities, or permanent markers and/or memorial structures (if any will be allowed), including concerns such as when a commemoration

site will be closed, what will be done with notes and tributes, and how students will be informed in advance.

6. Determine how to strike a balance among honoring the loss, resuming routines and schedules, and maintaining hope for the future.

7. Provide plans for dealing with mass casualty incidents.

Public Health, Medical and Mental Health Annex

This annex focuses on procedures to address emergency medical (e.g., first aid), public health, and mental health counseling issues. These efforts should be coordinated with the appropriate emergency medical services, public health, mental health, law enforcement, fire department, and emergency management representatives. (Mental health needs after an emergency are addressed in the Recovery Annex.)

Exhibit plans to meet each of these goals:

1. Describe the role of individuals in providing first aid during an emergency.
2. Determine location of emergency medical supplies (first aid kits, AEDs, etc.) and who is responsible for purchasing and maintaining those materials.
3. Identify staff with relevant training/credentialing in areas such as first aid or CPR.
4. Communicate and report information about outbreaks or epidemics or other unusual medical situations to the local/state health authorities.
5. Support the needs of all constituencies identified by the threat assessment team.

{Suggested cited resources: Building/unit safety plans, training materials/logs, building emergency postings, Pandemic Influenza Plan, CERT program documentation.}

Security Annex

This annex focuses on procedures implemented on a routine, on-going basis to secure the technical college from criminal threats originating from both inside and outside. This includes efforts done in conjunction and cooperation with law enforcement agencies.

Exhibit plans to meet each of these goals:

1. Establish agreements with law enforcement agencies to address the daily role of law enforcement officers in and around campus.
2. Ensure buildings and facilities are physically secure (may include, but not be limited to, implementation of Crime Prevention through Environmental Design [CPTED]).
3. Assist individuals in safely traveling to, from, and within campuses safely (including traffic control and pedestrian safety).
4. Keep prohibited items or materials off campus.
5. Respond to threats identified by the Threat Assessment Team.
6. Address issues related to cybersecurity and threats to information technology systems.
7. Provide security at stadiums, convention centers, arenas, and other large-event facilities.
8. Provide security for sensitive facilities, including research facilities/laboratories on the campus.
9. Share information with members of public safety agencies (maintaining requirements or limitations of applicable privacy laws, including FERPA, HIPAA, and other civil rights laws).

{Suggested cited references: Law Enforcement SOPs, tactical manuals, memoranda of understanding/agreement, mutual aid agreements.}

Rapid Assessment Annex

This annex focuses on procedures to be implemented when the technical college is notified of or becomes aware of an occurring or impending emergency situation.

Exhibit plans to meet each of these goals:

1. Immediately gather information to determine the type and scale of the incident.
2. Determine an appropriate response.
3. Determine which annexes should be implemented.
4. Take immediate action to protect life and property.
5. Verify procedures are consistent with the requirements of the Clery Act.
6. Ensure the Incident Commander has responsibility for the management of all emergency activities, including development, implementation, and review of strategic decisions. These actions and decisions are made in concert and in consultation with other community response partners and leaders as applicable.

{Suggested cited references: Law Enforcement SOPs, tactical manuals, emergency policies/procedures, emergency media outlet and federal, state and local information sources.}

Hazard-Specific Annexes

The Hazard-Specific annexes address specific hazards to the individual technical college. In the Emergency Operations Plan, the identification and prioritization of hazards is accomplished within the formal Business Continuity Plan; specifically within the Hazard Vulnerability Assessment Instrument. The Hazard Vulnerability Assessment Instrument addresses natural hazards (including, but not limited to, tornado, winds, thunderstorm, winter weather, floods/dam failure, wildfires, lightning, drought, hurricane, earthquake; technological hazards (including, but not limited, to structural collapse, utility failure, power failure, network failure/cyber attacks, telecommunications failure, major fire, vehicle/air/train accident; biological hazards (including, but not limited to, disease and contaminated food outbreaks; as well as adversarial, incidental and human-caused hazards (including, but not limited to, civil disorder, terroristic threat, hazardous materials, armed intruder, and hostage situation). Once identified, each of these hazards is individually assessed as to their probability, business continuity impact and financial impact.

Specific procedures as well as corresponding documents that address the hazards identified by the college, are described in the following individual technical college identified annexes.

{These annexes must reflect, at minimum, those hazards identified through a hazard vulnerability assessment process and prioritized, individually or in any combination, of high probability, high business continuity impact and/or high financial impact. Suggested cited references: Functional Annexes, Building/unit safety plans, training materials/logs, building emergency postings.}
